

IC ULV Fogger Machine 3 Nozzles

Art no	FCMIMC00012
Tank capacity	4 Liters
Droplet throw	15 meters
Size (mm)	413 (height) x 261 (width) x 286 (depth)
Motor speed	20,000 RPM
Country of origin	China

An electric Cold fogger with three rugged nylon nozzles. It is intended for applications of water based chemical solution. The body and tank are made of high-density chemical resistant polyethylene. The particle sizes generated range from 7 to 30 microns VMD, depending on the flow rate and viscosity of the materials.

Why IC ULV Fogger Machine 3 Nozzles?

- › Used in hospitals, schools, nursing homes, greenhouses, stables, warehouses, homes, and farm buildings.
- › Special for dispensing most chemicals which are labeled for aerosol or mist application such as disinfectants, deodorizers, germicides, insecticides, etc.
- › It covers 360 degrees with 3 nozzles and motor speed of 20,000 RPM.
- › To reduce the consumption of the chemical solution by dilution of 1:10 with water.
- › The ULV fogging machines generate a fog or mist formed of Ultra Low Volume (ULV) droplets between 7-30 microns (μm) in diameter.

How to use IC ULV Fogger Machine 3 Nozzles ?

Dilute 350 ml of the chemical solution with 3.5 liters of water in the tank.

Intercare Floorcare guarantees the quality of the product . Its application recommendations are based on the test and practical experience .

we accept no responsibility for damage caused through improper use of the product .
